

Payton Murdoch

Cybersecurity / Security Operations / Data Protection

Vancouver, BC | payton.murdoch@gmail.com

plmurdoch.github.io | linkedin.com/in/plmurdoch | github.com/plmurdoch

Security operations and data protection experience in financial services and insurance. Work spans endpoint and email security, IAM, Microsoft Purview DLP, phishing investigations, security metrics, and incident response support.

PROFESSIONAL EXPERIENCE

Data Security & Governance Analyst (Trainee)

Tru Cooperative Bank | Oct 2025 - Present | Formerly First West Credit Union

- Tested Microsoft Purview sensitivity labels and data loss prevention policies with users.
- Supported Security Operations investigations of reported phishing emails, Copilot prompts, and security incidents.
- Performed a gap analysis of cybersecurity tools in the Azure environment.
- Researched and drafted a departmental RACI for customer identity and access management; delivered phishing-awareness guidance to front-line staff.

Cyber Security Administrator

TuGo | Jun 2025 - Oct 2025

- Served as the main cybersecurity contact, administering CrowdStrike, Microsoft, Darktrace, Fortinet, and Imperva services.
- Supported threat risk assessments, incident readiness and response, and disaster recovery planning.
- Supported security training administration and kept leadership informed about emerging security trends.

Cyber Security Project Coordinator (Part-time)

First West Credit Union | Jul 2024 - Jun 2025

- Researched security practices against NIST, CIS, and OSFI frameworks; gathered KPIs and KRIs and assessed proposed metrics.
- Improved the realism of phishing training and scripted active-user update and deletion lists for the training program.
- Developed a process for gathering IT project security requirements and supported data security policy documentation and awareness content.

TECHNICAL CAPABILITIES

Workplace platforms: Microsoft 365 Defender, CrowdStrike Falcon, Darktrace, Microsoft Purview, KnowBe4, Fortinet, Imperva; Azure security exposure.

Capabilities: IAM, DLP, data classification / retention / access control, SIEM and log management, vulnerability management, incident response support, audit readiness, NIST / CIS / OSFI.

Programming and academic labs: Python, SQL, Wireshark, GNS3, Snort, iptables, Nmap, Nessus, Metasploit, Cisco ASA, Palo Alto NGFW, scikit-learn, PyTorch.

SELECTED SECURITY PROJECTS

Phishing email detection (academic team project, 2024): Compared machine-learning approaches for classifying legitimate and phishing emails, using phishing data provided by the UVic Systems team. [View artifact](#).

DoS traffic detection (academic team project, 2024): Built training and evaluation scripts to distinguish benign network flows from denial-of-service traffic in an academic test environment. [View artifact](#).

EDUCATION & CERTIFICATION

MEng, Telecommunications and Information Security | University of Victoria | 2023-2024

BSc, Computer Science | University of Victoria | 2018-2023

ISC2 Certified in Cybersecurity (CC) | Sep 2024-Aug 2027
